ENVIRONMENTAL CHEMISTS

Analysis For Total Metals By EPA Method 200.8

Client ID: M02739 Alaskan Copper Works Client: Metro K.C. Grab, PO M02739 Date Received: Project: 11/18/08 Date Extracted: 11/18/08 Lab ID: 811199-01 x10 11/19/08 Data File: 811199-01 x10.044 Date Analyzed: ICPMS1 Water Instrument: Matrix: Units: Operator: ug/L (ppb)

Lower Upper Internal Standard: % Recovery: Limit: Limit: Germanium 105 60 125

Concentration ug/L (ppb)

Chromium 553
Nickel 695
Copper 489
Zinc 48.6

QUALITY ASSURANCE RESULTS FOR THE ANALYSIS OF WATER SAMPLES FOR TOTAL METALS USING EPA METHOD 200.8

Laboratory Code: 811185-01 (Duplicate)

Analyte_	Reporting Units	Sample Result	Duplicate Result	Relative Percent Difference	Acceptance Criteria
Chromium	ug/L (ppb)	<1	<1	nm	0-20
Nickel	ug/L (ppb)	9.94	10.3	4	0-20
Copper	ug/L (ppb)	1.04	1.15	10	0-20
Zinc	ug/L (ppb)	5.69	6.26	10	0-20

Laboratory Code: 811185-01 (Matrix Spike)

				Percent	
Analyte	Reporting Units	Spike Level	Sample Result	Recovery MS	Acceptance Criteria
Chromium	ug/L (ppb)	20	<1	100	50-150
Nickel	ug/L (ppb)	20	9.94	99 b	50-150
Copper	ug/L (ppb)	20	1.04	96	50-150
Zinc	ug/L (ppb)	50	5.69	93	50-150

Laboratory Code: Laboratory Control Sample

		Spike	Percent Recovery	Acceptance			
Analyte	Reporting Units	Level	LCS	Criteria			
Chromium	ug/L (ppb)	20	98	70-130			
Nickel	ug/L (ppb)	20	98	70-130			
Copper	ug/L (ppb)	20	95	70-130			
Zinc	ug/L (ppb)	50	87	70-130			

ENVIRONMENTAL CHEMISTS

Data Qualifiers & Definitions

- a The analyte was detected at a level less than five times the reporting limit. The RPD results may not provide reliable information on the variability of the analysis.
- A1 More than one compound of similar molecule structure was identified with equal probablility.
- b The analyte was spiked at a level that was less than five times that present in the sample. Matrix spike recoveries may not be meaningful.
- ca The calibration results for this range fell outside of acceptance criteria. The value reported is an estimate.
- c The presence of the analyte indicated may be due to carryover from previous sample injections.
- d The sample was diluted. Detection limits may be raised due to dilution.
- ds The sample was diluted. Detection limits are raised due to dilution and surrogate recoveries may not be meaningful.
- dv Insufficient sample was available to achieve normal reporting limits and limits are raised accordingly.
- fb The analyte indicated was found in the method blank. The result should be considered an estimate.
- fc The compound is a common laboratory and field contaminant.
- hr The sample and duplicate were reextracted and reanalyzed. RPD results were still outside of control limits. The variability is attributed to sample inhomogeneity.
- ht The sample was extracted outside of holding time. Results should be considered estimates.
- ip Recovery fell outside of normal control limits. Compounds in the sample matrix interfered with the quantitation of the analyte.
- j The result is below normal reporting limits. The value reported is an estimate.
- J The internal standard associated with the analyte is out of control limits. The reported concentration is an estimate.
- jl The analyte result in the laboratory control sample is out of control limits. The reported concentration should be considered an estimate.
- jr The rpd result in laboratory control sample associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- js The surrogate associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- lc The presence of the compound indicated is likely due to laboratory contamination.
- L The reported concentration was generated from a library search.
- nm The analyte was not detected in one or more of the duplicate analyses. Therefore, calculation of the RPD is not applicable.
- pc The sample was received in a container not approved by the method. The value reported should be considered an estimate.
- pr The sample was received with incorrect preservation. The value reported should be considered an estimate.
- ve The value reported exceeded the calibration range established for the analyte. The reported concentration should be considered an estimate.
- vo The value reported fell outside the control limits established for this analyte.
- x The pattern of peaks present is not indicative of diesel.
- y The pattern of peaks present is not indicative of motor oil.

November 21, 2008

Gerry Thompson, Project Manager Alaskan Copper Works 628 South Hanford Seattle, WA 98134

Dear Mr. Thompson:

Included are the results from the testing of material submitted on November 18, 2008 from the Metro K.C. Grab, PO M02739, F&BI 811199 project. There are 4 pages included in this report. Any samples that may remain are currently scheduled for disposal in 30 days. If you would like us to return your samples or arrange for long term storage at our offices, please contact us as soon as possible.

We appreciate this opportunity to be of service to you and hope you will call if you should have any questions.

Sincerely,

FRIEDMAN & BRUYA, INC.

Michael Erdahl Project Manager
